MICHIGAN CUSTOMERS: Add 3% sales tax.

Send with your order the names of five or more friends interested in Iris, Hemerocallis or Tree Peonies, and we will be glad to include some extras with your order.

We are very grateful to all our customers who have sent us such nice orders. In filling orders, we always try to do a little more than we promise.

The home of ARVISTA GARDENS is just three houses north of Highway US-12, one block east of its junction with M-78.

Visitors are always welcome at ARVISTA GARDENS, though on Saturdays we are usually otherwise occupied and cannot give personal attention.

SHIPPING TIME

Beardless Irises may be shipped throughout the season except when in bloom. They should have plenty of moisture until established. Bearded Irises are shipped from early July to the close of the season. Planting instructions accompany all shipments.

WORLD'S FINEST IRISES

I have been growing irises for the last 32 years. During that time I have grown and discarded hundreds of varieties, judged many shows, visited scores of gardens and actually studied thousands of new irises when they were introduced.

The iris you will find on the accompanying list are the world's finest, the cream of the crop. Those that do not come up to the highest standards find no place in my fields. Each variety has met the most rigid tests from the standpoint of hardiness, color, habit of growth, floriferousness and grace. You may be assured of perfect satisfaction no matter which varieties you select.

If you will send me an order, even a small one, you, like thousands of other gardeners, will be convinced that any flowers you purchase from Arvista Gardens will more than meet your most sanguine expectations.

Also, please note that in spite of greatly increased postal rates we have lowered our prices on many varieties instead of raising them.

IRIS GARDEN SPECIAL

If you are only interested in enjoying the blossoms of beautiful iris and do not care to keep track of the names by using garden markers, here is an offer you cannot afford to miss.

We will send you 30 splendid irises, including at least 15 varieties--most likely more--our selection, for only \$6.50, express charges collect. If you selected these irises and we labeled them, they would cost 60 cents each.

You would naturally think that there is a string attached to this offer. Well, there is. All we ask is that when the irises burst into bloom, and you show them to your friends and neighbors, you tell them where they came from. We charge this offer to advertising.

THE VESPER IRIS (Dichotoma)

We quote the following article about the Vesper Iris from the April, 1952, number of the FLOWER GROWER:

"Here's an iris that tells time! At three o'clock every afternoon from late July to frost the 2-inch flowers open into colorful gems of blue, lavender or wine color, some enhanced by orange, mahogany or tyrian markings on the attractive falls.

"By crossing and selection, the height of the Vesper Iris (*I. Dichotoma*) has been increased from the 2 feet it attained several decades ago to 3 or even 4 feet, and stems are so wiry that they need no staking. The number of blossoms per plant has been doubled so that a single well grown clump will now display 100 or more flowers every day for a month or even longer, and the new brighter colors which have been added are still being improved each year.

"The candelabra-like branching of the Vesper Iris spaces each open flower in the clump so advantageously that it is usually difficult to find one blossom touching another. From a little distance the flowers look like gorgeous butterflies at rest without stretched wings. Flower beauty is never

marred by wilted blossoms. Each open bloom curls into a graceful little spiral during the night and usually drops to the ground before sunrise to be replaced by another crisp flower the next afternoon.

"What's more, the Vesper Iris is easy to grow! It thrives in half sun or in the open in a great variety of soils, preferring rich, heavy loam, but also tolerating stony, sandy ground. As for hardiness, it survives winters without protection, even when the temperature drops to 15 degrees below zero. This is true only of plants set out before the blooming season. Fall plantings do not become sufficiently established to withstand the rigors of winter.

"Unlike other iris, which must be planted in late summer or fall for spring bloom, the Vesper Iris is ideal for the impatient gardener. Soon after it is set out in spring the blossoms will begin to appear. And it is very rare indeed when a plant fails to do so.

"The jewel-like flowers of the Vesper Iris will attract more hummingbirds and bees than any other flower in your garden. The buzzing bees found in a large planting can be heard almost a block away, yet you may walk through the planting without the slightest danger of being stung--so intent are the bees in gathering the nectar.

"Few gardeners know this delicately beautiful flower. If you want something different for your garden, you'll find this a leading candidate. Even if you've never planted a garden you'll have success with this easy-to-grow iris."

Mrs. T. W. Barnes, of Oklahoma, wrote the following information about the experience she had with Vesper Iris:

"I ordered 3 Vesper Iris.... This year the plants sent up 10 bloom stems and had 6450 blooms. Bloomed from 60 to 225 blooms per day from July 17 to Aug. 29. Flower stems grew 36 inches high.

We have an excellent crop of Vesper Iris available for spring shipment. Order now so you will be certain to have this lovely and unusual iris blooming in your garden this summer.

5 husky plants for only \$1.95, postpaid.

10 for only \$3.75, postpaid.

SPRING and FALL BLOOMING IRISES

In favorable locations, these "double dute" Irises have bloomed in every month of the year. Most of them usually make rather small rhizomes. In height, they run from 24 to 32 inches.

SIBERIAN IRISES

We offer the finest collection of Siberian Irises to be found anywhere. They will flourish in ordinary garden soil or where the ground is moist.

Siberian Irises are the ideal flower for the busy gardener because they require no more care than to keep them free from weeds. After they become well established they even crowd out the weeds.

A rhizome set out this year will soon form a large clump and produce a veritable fountain of flowers. It is not necessary to dig and separate the plants as the clump will become larger and larger and more beautiful and imposing year after year.

Be sure to include at least a few Siberian Irises in your order. They will provide you with gorgeous cut flowers the rest of your days. The delicately beautiful blossoms appear in great abundance on slender, tall, graceful stalks.

ORIENTAL POPPIES

The great Oriental Poppies are easily the most striking note in the June garden. They need only good garden soil. Plant so that the crowns are two to three inches below the surface, and cover with a light straw mulch after the ground freezes in the fall. Send 10¢ for our leaflet, "Oriental Poppies and How to Grow Them." We ship mature plants, 2 years or more from propagation. Shipments at proper planting time.

HEMEROCALLIS or DAYLILIES

Hemerocallis are new and only comparatively few gardeners are familiar with them. First of all you must not associate these gorgeously colored flowers with the old daylilies.

To make as many gardeners as possible acquainted with modern hemerocallis, we offer 10 beautiful varieties, each one correctly labeled, for only \$3.50, which is only a fraction of their catalog values.

We shall be glad to quote you most attractive prices on large lots of hemerocallis.

I am so pleased with all the plants I ordered from you, and I thank you so much for the many extras you sent. Some of my *Hemerocallis* bloomed in four weeks after I got them. Thanks. -- Texas.

I wish to thank you for the Daylily "Sunny West" and for the extras, Iris. They were such nice plants and arrived in such excellent condition. Thanking you again. --Texas.

The Iris and Hems. arrived today in most excellent shape. Thanks for the extras. The Hems. are especially fine--nicest plants I have ever seen. Good Luck and a good season to you. -- Columbus, Ohio.

TREE PEONIES
(Paeonia Arborea)

These are the aristocrats of all peonies. With woody stems, the plants attain a height of over five feet and a similar spread, and show colors unknown in the Chinese classes. They bloom generally earlier than the latter, and are very free flowering. This collection represents perhaps the finest assortment available today. However, due to recent labor conditions, propagation has been curtailed.

This season we offer a limited list by name in 2 year plants from 5 in. pots. We hope to be able to offer field plants in another year or so.

Tree Peonies will be shipped express collect only.

DOUBLE CHINESES VARIETIES

ARCHIDUC LUDOVICO--Enormous flowers, flesh-pink, turning to soft lilac.	\$ 3.75
ATHLETE--Large double flowers of fine glazed mauve shaded rose, vigorous and prolific.	3.50
JULES PIRLOT--A magnificent variety of perfect globular form. Satiny pink, flushed carmine. Free blooming.	3.75
REINE ELIZABETH--Probably the finest of all salmon-rose double tree peonies. Large, perfectly shaped flowers of brilliant salmon rose, one of the richest shades in flowers.	3.75
SOUVENIR DE DUCHER--Large, globular bloom of bright reddish violet with silvery reflex. One of the finest in the dark colored varieties.	3.75
TRIUMPHE DE VANDERMAELEN--Large, clear rose-purple, very vivid in center and very free blooming.	3.75

MARVELOUS LUTEA HYBRIDS

These hybrids form a class all their own. They are hybrids from Peony Lutea, characterized by bright green foliage and longest blooming season, beginning just before the Chinese Peonies and continuing to open buds nearly two weeks after the others are gone. This group contains the noted yellow varieties.

ARGOSY--Single flower of clear sulphur yellow with a red blotch at the base of the petal. Flowers are from 5 to 7 inches across. Very free blooming.	6.50
--	------

FLAMBEAU--Full double flower of bright salmon red with amaranth veins passing to a paler shade after some days. A great novelty.	7.50
LA LORRAINE--A fully double flower of soft sulpher yellow flushed salmon. Formerly at \$35, now only	7.50
SATIN ROUGE--An altogether new color in peonies--double blood-orange. A vigorous plant with bright green foliage.	8.00
SOUVENIR DE MAXIME CIRNU--Forms a plant 3 to 4 feet high which produces many beautifully shaped full double flowers of a deep yellow, heavily shaded orange salmon. Fragrant.	10.00

JAPANESE VARIETIES

FLORA--Most enchantingly beautiful. Pure transparent white, lightly blotched violet-carmine in the throat. Immense flower of marvelous form.	11.00
YASO-NO-MINE--Very large double flowers of purest white, on strong, upright stems. The finest white we know.	20.00

PEONIES

The peony is known as "the king of the perennials". We have about 150 varieties of peonies, but do not have sufficient stock of any given variety to list them by name. They vary in price from \$0.75 to \$15.00 each.

We will send you 5 peonies, all outstanding varieties, no two alike, correctly labeled, for only \$5.00, which is far less than they are listed in catalogs. If you have the room, you will be getting a real bargain by accepting my offer of 12 gorgeous peonies, all different, for only \$12.00.

Shipment will be made after September 1 until the ground freezes.

I must write and tell you how nice the Iris that I ordered from you are. They are the nicest I ever bought anywhere. And if the blooms are as nice as the plants, I will be more than pleased. I will recommend you to my flower friends.--Ohio.

I wish to thank you for the fine Iris and Daylilies. They arrived in fine shape and every one is doing beautifully.--California

MIRACLE PLANT (Mimosa Pudica)

We have been fortunate enough to secure a limited supply of seed of the most remarkable plant we have ever seen. It has beautiful green foliage and fern-like leaves. When you touch the plant the leaves on that particular branch will fold up just like folding a piece of paper. And that is not all. The branches will droop so greatly that they appear to be almost broken off.

Within fifteen or twenty minutes, however, the leaves will spread out into their usual position and the branches will pull themselves up again. No matter how many times you touch the plant it will always perform in the same manner.

Here is a plant which appears to have muscles and its strength may be increased. The branches will pull up a light weight suspended on them. This may be increased from time to time until the lifting power of the plant doubles.

Fortunately this unusual plant may easily be grown from seed in the house or out of doors. If you can grow radishes you can grow the MIRACLE PLANT. Plant the seed in pots in the house and after the plants shoot up a few inches transfer them to individual pots. A three or four inch pot will do.

The plants will grow rapidly in the house if placed in a sunny window. This remarkable plant will astonish your friends and neighbors. You will have plenty of plants to use as bridge prizes or gifts.

We cannot urge you too strongly to get your order into the mail today. Our supply of seed is limited.

The price: Only 35 cents for a generous packet of seed.

MATCHLESS LETTUCE--THE WORLD'S BEST

Leafy green vegetables are among our most healthful foods. They are, unfortunately, usually greatly lacking in the American diet. They supply vitamins, iron and other

minerals which are needed for blood building.

Head lettuce, which consists largely of blanched leaves, is of little value compared with MATCHLESS LETTUCE, which is rich green and an excellent source of vitamins and minerals as well as chlorophyll. Head lettuce found on the market may be a week or more old before it reaches your table. Green vegetables lose their potency as far as vitamins are concerned every hour they are on the grocer's shelves. Many tests have shown that the loss in many instances is so great that the vitamin content is negligible.

Why not get your vitamins from the garden instead of a bottle. It is far less expensive, and natural vitamins are superior to synthetic ones.

MATCHLESS LETTUCE has such delicious flavor that every member of your family will like it. Many gardeners eat it fresh from the garden without benefit of dressing of any sort. It is sweet and tender, in fact, you must try it to appreciate it.

THE PRICE--only 30 cents for a generous sized packet. Mix it thoroughly with a cup of dry sand so the seeds will be spaced far enough to prevent overcrowding. This seed is expensive and scarce and should not be wasted.

I received my order of Iris today and want to thank you. Of all the flowers I've ever ordered these are the nicest and healthiest plants I've ever seen. Thanks for your prompt attention to my order. --Ohio.

The Iris were wonderful--such healthy plants and packed so beautifully. The "Iris Garden" certainly surprised me. I had no idea there would be even half the amount of plants. --Michigan.

Although I have received plants from many sources, and all of them excellent for the sending of fine plants, none have ever beaten the quality or performance of the plants from your nursery. --Mrs. L. L., Osgood, Indiana.
